Application

Used as a primary and/or secondary storage unit during oil recovery operations. It can also be used as a working platform for recovery operation using a Vikoma boom sweep in conjunction with a GT-185 skimmer. It can also serve as a simple deck working platform to carry material and equipment, supporting shoreline clean-up operations.

Description

The SMTB 7 is a single-hull steel barge. It has three storage compartments for the oily water, allowing for natural decanting of water, with a total storage capacity of 1,200m³. It is a dedicated response vessel fitted with one diesel generator, one crane, and three cargo pumps. The barge is configured for sweep and recovery operation using a Vikoma boom and GT-185 skimmer.
