Phoenix Wailer	-	-	1	1
Starter Pistol	2	-	14	16
Bird Hazing Kit (effigies, tape & Balloon's)	8	-	12	20
Total	12	5	34	51

Application

Bird scaring devices are used to help move birds away from oiled areas to reduce the risk of contamination to the birds.

Description

The bird scaring devices listed above all use sound as the deterrent mechanism. The sounds are generated by electronic speakers (Breco Buoy, Phoenix Wailer), controlled gas explosion (propane cannon), and 6mm pistol blanks and "whizzers" (Starter Pistols). The range and effectiveness varies with each device. The electronic devices use a random sequence of sounds to reduce the habituation of the birds to the sounds. Each of the devices is designed to be operated on land or on a boat. The Breco Buoy is also a free-floating unit designed to drift with an oil slick.

Operating Data

	<u>Deterrent Radius</u>	<u>Run Time</u>
Breco Buoy:	800 m	3 days
GooseBuster	Up to 7 acres	-
Propane Cannons:	750 m	3-7 days
Phoenix Wailer:	800 m	7 days
Starter Pistol:	200 m	-

Technical Data

Breco:	130 dB (max), 2-3.5 min blast cycles, 10-12 sounds/cycle
Goose Buster:	110db(max) at speaker, constantly changing frequency of sounds
Wailer:	119dB (max), 0.5-32 min sound cycles, 16-64 sounds/cycle
Cannon:	24 hour on/off programmable, 4 blast cycle settings
