Utilisation

Inflatable boats provide versatility in response operations for both transportation and active duty in near shore or sheltered water operations.

Description

Non-rigid hull inflatable boats with a fabric, air filled flotation collar that makes up the bow and sides (gunnels) of the boat. The flotation collar supplies buoyancy (with reserve), stability, and absorbs wave energy to soften the ride in rough conditions. Equipped with outboard motor and either a centre steering console or tiller control.

Rigid hull inflatable boats equipped with outboard motor (15 to 70 HP); molded fibreglass, plastic or metal hulls (including floor) with a fabric air filled flotation collar that makes up the bow and sides of the boat. The rigid hull provides stability for operation of the boat in most sea conditions. The flotation collar supplies buoyancy (with reserve), stability and absorbs wave energy to soften the ride in rough conditions.

Operating Data

Speed: up to 30 knots

Accessories

VHF
Some equipped with radar
Depth Sounder

Technical Data

Length: 5.3 - 5,9m
Width: 1.70m -2.2m
Draft: 35cm – 40 cm
