

TENT-SHELTER

Inventory

	Great Lakes	Québec	Atlantic	Total
Tents	5	10	9	24

Application

Tents are used for many purposes, i.e. equipment storage, communications centres, food and rest shelter for workers and decontamination centres for workers.

Description

They consist of a metal frame attached to two plastic pivots. Onto this structure, a polymesh shell, fire retardant, UV rated, is fastened and the protection unit is complete. Units are stored pre-assembled. When folded, they can be transported on the back of a ½ ton truck. Two people can erect a unit in about 10 minutes. They can be used at any period of the year.

Operating Data

One or more units can be combined
Can be erected in 10 minutes

Ancillaries

Hot air heater
